

Midlands Engine Health

Work is underway to host a visit by Rosalind Campion, the Director of the Office for Life Sciences (OLS) on 27 September. The OLS will be a critical partner in the pursuit of our strategic aims of increasing investment and research activity in the Midlands, so this meeting promises to be a useful and productive one. The event will be held at Charnwood Campus in Loughborough and will include a site visit at the **drug development company Almac**. Representatives of businesses in the health and life sciences sector have been invited to take part in a roundtable session with Rosalind.

The Mental Health and Productivity Pilot team are planning a high-profile visit from the Department for Work and Pensions Director General Katie Farrington and Department for Health and Social Care Director General Jonathan Marron. The event is expected to take place in November.
